Edouard Herriot), only brighter and more brilliant than when that variety is at its best, and you will have some conception of the beauty of this little gem which on account of the similarity in color has been known among the cut flower trade as Baby Herriot. Its color is a shrimp-pink with intense coppery-yellow suffusion, the base of the petals golden-yellow which intensifies and lightens up its high colors. Plant is of free growth and floriferous. This charming and dainty Rose is of beautiful rounded habit and is a huge bouquet of deep cerise or Geranium-pink with distinct showy center of pure white; florets not crowded, but of beautiful arrangement, and cannot be beaten. The color is irresistible. Plant grows like a weed and flowers are nearly "immortelle" in their lasting qualities. We believe that they will outlast almost any Rose in existence with their stiff paper-like texture. This pretty Rose has taken Europe by storm and has made a sensation. Awarded gold medal.

RED ORLEANS (Poly.)—Color is brilliant geranium red, suffused with rose, and center white. The flowers come in great trusses and make a fine showing all summer. This Rose when massed in solid beds or along borders is very fine. Awarded a gold medal.

The color is absolutely new, and quite startling in its brilliancy, golden-yellow tipped with clear, bright cerise. ALIDA LOVETT (H. W.)—Both buds and flowers are large; are of ideal form, are held on stiff stems a foot and a half to two feet long and the color is a lively bright shell-pink with shadings of rich sulphur at the base of the petals—a combination that is both novel and beautiful. The flowers are of remarkable substance and long-lived, whether cut or left to remain upon the plant, and are pleasantly perfumed. It is very much brighter than those of the justly popular Dr. Van Fleet Rose.

AMERICAN PILLAR (Conard, 1909.) (H. M.)—A single flowering variety of great beauty, which appeals to everyone. The flowers are of enormous size, three to four inches across, of a lovely shade of apple-blossom pink, with a clear white eye and clusters of yellow stamens. These flowers are borne in immense bunches, and a large plant in full bloom is a sight not easily forgotten. They last in perfection a long time and are followed by brilliant red hips or berries, which are carried late into the winter; and as the plant frequently retains its lovely green foliage until the end of November, it forms a beautiful decorative subject throughout the autumn. A great Rose to grow in pots for Easter.

A vigorous grower and free bloomer. The large glossy foliage, like that of Silver Moon, greatly enhances the beauty of the flowers.

BIRDIE BLYE (Heart of France.)—Introduced by the Conard & Jones Company and so popular that it sold out faster than we grew it. Our patrons from various parts clamored for more because it can always be counted on for its bright satiny-pink blossoms—quite cup shaped with fragrance in the cup. You'd enjoy this Rose planted where it could grow to 3 to 4 feet and please you with weekly bouquets.

from three and one-half to four inches in diameter, borne singly and in clusters, of perfect form, beautiful in the bud, and in the fully expanded flower; in color a most refreshing bright wild-rose pink; it flowers profusely during June and continues more or less throughout the season.

CLIMBING AMERICAN BEAUTY (Hoopes Brothers & Thomas, 1911.) (H. W.)—

A seedling from American Beauty with Wichuriana and Tea blood in its veins. The introducers say of it: "Same color, size and fragrance as American Beauty, with the addition of the climbing habit. Good foliage and better blooming qualities. One plant of this new Rose will produce twenty times as many flowers in June as the old American Beauty, besides blooming occasionally during the summer. Blooms three to four inches across; has proved perfectly hardy and stands heat and drought as well as any Rose in our collection." This Rose has already made its mark and wherever it has been planted it has pleased until today we sell it by the tens of thousands. You lose if you are slow to take hold of the "Climbing American Beauty." It grows and blooms.

CLIMBING WHITE AMERICAN BEAUTY (H. W.)—

Silver Moon X Kaiserin Augusta Victoria. A hardy disease-resistant variety, similar to Kaiserin Augusta Victoria, but of more vigorous growth and greater freedom of bloom. It is much more double than Silver Moon, with but a single flower to a stem. Has excellent keeping qualities.

EMILY GRAY (H. W.)—A new yellow climbing Rose with glossy, undulated holly-like foliage. The buds are long and flowers of golden yellow are large and semi-double. A valuable acquisition. Needs winter protection north of Washington, D. C.

The Best New and Old Hardy Climbing Roses of Various Types

FOR PRICES SEE PAGES 10 TO 13

EUGENE JACQUET—The earliest and most profuse flowering of all the climbers and of the easiest cultivation. Almost every eye produces a handsome truss of fragrant, cherry-red flowers, borne evenly and uniformly in the greatest profusion. Eugene Jacquet can be bloomed in February without difficulty. It flowers a week earlier than Tausendschoen or Rosarie under the same conditions and carries handsome, dark green, mildew-resisting foliage. It holds the flower unusually long—the color improves with age. Eugene Jacquet should be forced so as to show color ten days before Easter to be at its best for Easter sales.

GARDENIA (Soupert & Notting, 1900.) (H. W.)—Bright yellow, cream color when open; very fragrant and free; early flowering. This is the hardy Marechal Niel; double yellow flowering.

HEART OF GOLD (H. W.) (Originated by Dr. W. Van Fleet.)—R. Wichuraiana X R. Moyesi. Bud medium size; flower medium size, single, open, lasting, crimson shading to white center with yellow stamens, borne in clusters on medium long stems. Foliage abundant, medium size, rich green, glossy. Vigorous (10 feet) trailing, profuse bloomers for four weeks in May and June. Very hardy.

HIAWATHA (Walsh, 1905.) (H. W.)—Its flowers are about one and one-half inches across, and produced in long, pendulous sprays, with frequently from forty to fifty flowers on a spray. In color, it is brilliant ruby-carmine, with a clear white eye and a mass of golden stamens.

JACOTTE (H. W.) (Barbier & Co., 1920.)—R. Wichuraiana X Arthur R. Goodwin. Bud large, ovoid, orange and yellow; flower large, semi-double, open, cupped, very lasting; deep coppery yellow, tinted coppery red; borne, several together, on long, strong stem; fragrant. Foliage abundant, leathery, glossy, dark green, of medium size, disease-resistant. Bark green; many thorns. Very vigorous, climbing, trailing habit; blooms profusely in May and June.

JEAN GIRIN (Ward's Favorite.) (The ever-blooming Dorothy Perkins.)—The flowers are similar in form and color to the pink Dorothy Perkins. The chief merit of this rose is that after giving a mass of bloom in June, like the other climbers, it blooms again. This rose was a favorite of the late Admiral Aaron Ward, a noted rosarian, because of its habit of blooming a second time, which is most unusual in roses of the hardy climbing class. Cut off all of the old June blooms to help the plant produce more flowers during the summer and fall.

LADY GAY (Walsh, 1903.) (W.)—Flowers of a deep cherry pink, shading on the edge of the petals to a very delicate soft tone of pink.

MARY LOVETT (H. W.)—In this Dr. Van Fleet has brought out another Wichuraiana Hybrid, a cross between a seedling Wichuraiana and Kaiserin Augusta Victoria and termed a "White Dr. Van Fleet." This rose has done well during 1916 and is strongly recommended. Loses foliage early.

Mary Wallace

A Great Breeder's Legacy.

This is Dr. Van Fleet's masterpiece. The trade are slow in taking hold of this charming pillar rose. Hardy on a line with Washington, D. C. Blooms two or three times during the summer months. A pillar rose supporting itself in a bushy growth 6 to 8 feet high. Bright clear rose-pink with salmon at base of petals. The largest Hybrid Wichuraiana in existence.

PAUL'S SCARLET CLIMBER (W. Paul & Son, 1917.) (H. W.)—Vivid scarlet, shaded crimson, makes a brilliant display for a long period of time in the garden. A wonderful new climbing Rose. Received the gold medal and cup for the best new climber at the National Rose Society's exhibit.

RED DOROTHY PERKINS, or EXCELSA (Walsh, 1909.) (W.)—It is a good deal to claim for a Rose, but we are within bounds when we describe Excelsa as a brilliant Crimson Rambler. The defects of Crimson Rambler are its unsightly foliage in unseasonable weather and its defoliation by insects; the infusion of Wichuraiana blood assures an ornamental climber which is nearly evergreen; and this will assure this lovely crimson-scarlet pillar Rose a place in every American garden, for it is quite hardy in addition to all its other fine points. The flowers are very double, produced in large trusses of thirty to forty, and almost every eye on a shoot produces clusters of flowers. The color is intense crimson-maroon, the tips of the petals tinged with scarlet. The finest of all Crimson Ramblers.

ROSARY (Pink Tausendschoen)—This is a bright pink form of Tausendschoen. A grand Rose from any standpoint.

SARAH VAN FLEET (H. R.) (Dr. W. Van Fleet; intro. by American Rose Society, 1926.)—Reported to be hybrid of R. Rugosa X My Maryland. Bud large, ovoid; flower large, semi-double, open, cupped, moderately to intensely fragrant; lasting, wild-rose-pink, fading lighter in strong sunlight, borne singly and several together. Foliage abundant normal green, leathery Rugosa type, resistant to disease. Growth compact (maximum height about 6 feet); flowers abundantly in June and continues through summer with a good crop again in autumn.

SHOWER OF GOLD (Paul & Son, 1910.) (H. W.)—The color is a deep golden-yellow, with orange shadings in the center. This fills the "long felt want" for a "Yellow Rambler."

SILVER MOON (Henderson, 1910.) (H. W.)—Flowers very large, four and one-half inches and over in diameter. Pure white in color; petals of great substance, beautifully cupped, forming a clematis-like flower. The large bunch of yellow stamens in the center adds to its attractiveness.

TAUSENDSCHOEN, or THOUSAND BEAUTIES (Schwartz, 1906.) (H. M.)—The flowers upon first opening are the most delicate shade of pink ever seen in a Rose, might be described as a white, delicate flushed pink, changing to rosy-carmine. It gets its name from its many flowers and the variation in coloring; will become as famous as Crimson Rambler or Dorothy Perkins.

THE BEACON (H. Cl.)—Fiery red with distinct white eye.

VEILCHENBLAU, THE BLUE ROSE (Schmidt, 1909.) (H. M.)—This is a much better Rose than some give it credit for. It opens a reddish-violet, quickly changing to violet-blue.

WHITE DOROTHY PERKINS (B. R. Cant, 1908.) (W.)—It has been the cry of nurserymen for years for a white climber that would rank up with Crimson Rambler, and now we have the pleasure of offering this White Dorothy Perkins, that in every way is the equal, if not superior, to Crimson Rambler, as a red, and Dorothy Perkins as a Pink. This Rose has no rival as a white climber.

YVONNE (Hy. Wich.)—A beautiful shell pink; double and a good grower.

Hybrid Perpetual or Hardy Roses

AMERICAN BEAUTY (Ledecheaux, 1875.)—The well-known red forcing Rose.

ANNA DE DIESBACH (Lacharme, 1859.)—The famous "Glory of Paris." Bright, deep clear pink, of largest size, fine bud.

BLACK PRINCE (W. Paul, 1862.)—Deep blackish-crimson; large full and globular; very free flowering.

CAPTAIN CHRISTY (Lacharme, 1873.)—Delicate peach-blow pink, center richer in color; large and full.

CLIO (W. Paul, 1894.)—Flesh color, shaded in the center to rosy-peach. Large, fine, globular form; free bloomer.

DR. E. M. MILLS (Hybrid Huguonis.) (Dr. Van Fleet; intro. by American Rose Society, 1926.)—Flower medium size (2 to 2½ inches across), semi-double, globular, primrose with pink suffusion which becomes more pronounced in the later blooms.

EUGENE FUERST (Soupert, 1876.)—Color deep red shaded crimson. Profuse bloomer. A most charming superb grand Rose.

Hybrid Perpetual or Hardy Roses

FRAU KARL DRUSCHKI, or WHITE AMERICAN BEAUTY or SNOW QUEEN (Lambert, 1900).—This grand Rose has become renowned as the very highest type of its class and the best snow-white Rose ever introduced. It is an extraordinarily strong grower, and has the vigor and hardness of an oak. Its magnificent flowers are nothing less than glorious—immense in size and produced with great freedom. The color is a marvelous white, without a tinge of yellow or any other shade. A true paper white, the standard by which all white Roses are judged. We grow "White American Beauty" literally by hundreds of thousands.

GENERAL JACQUEMINOT (Roussel, 1853).—Crimson-scarlet; large, full. Very fragrant. Excellent.

GLOIRE LYONNAISE (Guillot, 1885).—Very large, full flowers. Color white, base of petals canary; Tea Rose perfume.

GEORGE AHRENDTS, or PINK AMERICAN BEAUTY (Hinner, 1910).—This is the wonderful "Pink American Beauty." This Rose we predict will have as large a following and be as largely planted in a very few years as the now famous "White American Beauty." We have looked it over in the field and we absolutely cannot detect a single fault in it or about it. The growth and make-up of the plants is superb, while the delicate pink color is unapproachable.

HEINRICH MUNCH—A soft pink, very large and full; vigorous, fine for forcing in pots and for garden culture. Took the sweepstakes prize at the Boskoop Rose Exhibition in 1913. This is without doubt the finest of all Hardy Pink Roses. It is a true Pink Druschki. Don't fail to try this rose.

HIS MAJESTY (McGredy, 1908).—The crimson Frau Karl Druschki. Deep, dark crimson, shaded deep vermillion-crimson towards the edges. Awarded gold medal, N. R. S., 1908.

HUGH DICKSON (Hugh Dickson, 1904).—Color brilliant crimson shaded scarlet; large and fine form, opening well in all weathers. Very sweetly scented.

J. B. CLARK (Hugh Dickson, 1903).—The color is unique among Roses, being deep scarlet shaded blackish-crimson, with rich bloom like a plum; flowers are large and beautifully formed. Awarded the gold medal, N. R. S.

MADAME CHARLES WOOD (E. Verdier, 1861).—Bright cherry-red; extremely free bloomer. A grand garden Rose. This is the same Rose as Dinsmore.

MADAME MASSON (Masson, 1856).—This is a glorious Rose. The flower is of the largest size. Color bright, brilliant red.

MADAME PLANTIER—This is the iron-clad white cemetery Rose.

MAGNA CHARTA (W. Paul, 1876).—Bright rose, very large and double, good form and fragrant; extra.

MARSHALL P. WILDER (Ellwanger, 1884).—A great many persons will not give up the contention that this is the ne plus ultra in red Roses. Deep, rich glowing red.

MRS. JOHN LAING (Bennett, 1887).—Color clear bright, shining pink; exquisitely shaded. Awarded gold medal, N. R. S.

PAUL NEYRON (Levet, 1869).—Deep rose; flowers of immense size; indeed many claim this to be the largest Rose grown.

PRINCE CAMILLE DE ROHAN (E. Verdier, 1861).—Deep velvety crimson-maroon, full and of good form and perhaps the best of all the hardy dark Roses.

ULRICH BRUNNER (Levet, 1881).—Cherry-red, of immense size, fine form and most effective in the garden.

VICKS CAPRICE—The striped Rose. Pale lilac pink, striped distinctly with old rose. The most valuable of all striped roses.

Moss Roses

These are probably a sport of the Cabbage Rose. The origin of the double Moss Rose is left to conjecture. They have always been favorites, for what can be more elegant than the bud of the Moss Rose and more delicious than its fragrance. Perfectly hardy.

ELIZABETH ROWE (Rowe, 1866).—This is an old favorite with its large deep pink buds well mossed. A beauty.

HENRI MARTIN (Portner, 1863).—Large, full flower of deep red; well mossed; fragrant.

MOUSSELINE (Robert and Moreau, 1881).—Pure white flower buds heavily and beautifully mossed.

PRINCESS ADELAIDE (Laffay, 1845).—Deep blush-pink with buds that are thoroughly mossed.

Wichuraianas

WICHURAIANA, or MEMORIAL ROSE (Dr. Wichura, of Japan, 1886.) (W.)—It is difficult to conceive anything more appropriate, beautiful and enduring for covering graves and plots in cemeteries than the Hardy Memorial Rose. It creeps along the ground as closely as an Ivy. The flowers are produced in lavish profusion in July. They are single, pure white, with a golden-yellow disc, five to six inches in circumference. It is also immensely valuable as a Climbing Rose, covering arches, fences, etc.

Banksias

WHITE BANKSIA, or LADY BANKS (Keer, 1807.) (L. B.)—A vigorous grower, in California, growing to the top of tall trees and completely enveloping the entire tree; small double, pure white flowers in clusters, with true violet fragrance. Indeed, if one were blindfolded, he could not detect the odor from Violets. Very desirable.

YELLOW BANKSIA, or LADY BANKS (Dampier, 1827.) (L. B.)—Same as White Banksia, except color of bloom is sulphur-yellow. Has the same delicious Violet fragrance.

Cherokee or Laevigata

AMOENA, The Pink Flowering Cherokee Rose (Hockebridge, 1909.) (L.)—The flowers are the same as the White Flowering Cherokee, except that the color is a glowing pink with a golden yellow center. Resembles huge apple blossoms.

LAEVIGATA, The Single White Cherokee Rose (Lindley, 1820.) (L.)—This is the famous Cherokee Rose so well known in California. Large, pure white flowers with center filled with golden-yellow anthers.

Rugosas

CONRAD FERDINAND MEYER (Froebel, 1900).—This Rose has Rugosa blood in its make-up and is classed by some as a Hybrid Rugosa. Flowers large, double, cup-shaped. Color deep, bright, vivid, intense pink, with the penetrating fragrance of the old June Roses. We have grown this Rose for years in this section of the country from Canada to the Gulf, and we have no hesitancy in saying after the most thorough and rigid test that a Rose can be put to that this Rose is in every respect just what we claim for it.

F. J. GROOTENDORST, (H. Rug.) (F. J. Grootendorst & Sons, 1920, disseminated in U. S. by A. N. Pierson, Inc. 1920).—Rosa Rugosa Rubra X Baby Rambler. Type, Rugosa foliage, Polyantha flowers. Bud small, ovoid; flower small, open, double, borne in clusters on average length stems; very lasting; slight fragrance. Color bright red, edges of petals serrated like a carnation. Foliage sufficient, small, leathery, wrinkled, dark green; disease resistant. Vigorous grower of bushy habit, bearing a profusion of bloom from June to October. Very hardy. First class certificate Boskoop, 1912.

NEW CENTURY (Conard, 1891.) (R.)—A grand Rose; this is entirely hardy, bearing beautiful silvery-pink flowers in clusters. This Rose is in bloom all the time.

NOVA ZEMBLA—The pure white Conrad F. Meyer.

SIR THOMAS LIPTON (Conard, 1905.) (R.)—The best pure white Rugosa Rose. Strong and vigorous; grows four feet high. Flowers perfectly double, pure snow-white. Fragrant.

LIBERTY—In the past we have sent out four Ferns that have stood the test, viz., Roosevelt, Teddy Junior, Goodii or Baby's Breath, Splendida or Big Four. We now offer Liberty, feeling sure that it will become as famous as any of the quartet. Liberty has a cast of blue that submerges the green; the fronds are finely cut and the outstanding qualifications of this variety are the fact that each pinna is crested or split, giving it a decided unique appearance. We feel sure this Fern will make a place for itself. Our claims for this Fern have been verified the past fall in the great number of repeat orders sent us after seeing it. It is the biggest make of them all.

TEDDY JUNIOR (The Fern for Every Household.)—The fronds are broad and beautifully tapered from base to tip; they droop just enough to make a shapely, graceful plant, permitting it to finish with a fine full center and perfect symmetrical spread. The pinnae are distinctly undulated, giving the fronds an attractive wavy appearance, which adds materially to their charming decorative effect. "Teddy Junior" will produce about four times more fronds than any other Fern ever introduced, finishing with fifty to sixty fronds in a four-inch pot.

JOHN WANAMAKER ("The Wanamaker Boston Fern")—A "sport" from Nephrolepis Scholzeli, with longer, narrower, gracefully drooping fronds. It is not so compact in growth as Scholzeli, and, therefore, does not decay in the center, and is a durable house Fern. It is a rapid grower, making an abundance of fronds, and is quite distinct from any other Nephrolepis.

ROOSEVELT—The pinnae are beautifully undulated, giving the Roosevelt a pronounced wavy effect seen in no other Fern; as the plant ages this effect becomes quite distinct. Our sales of Roosevelt have exceeded two hundred and fifty thousand plants.

SPLENDIDA ("The Big Four Fern") (Good & Reese.)—A decided novelty, originating with G. & R. a few years ago. It combines the good qualities of the four most popular sorts—the grace of the "Boston", wavy effect of "Roosevelt", fluffy effect of "Ostrich Plume", and the uniqueness of the "Fish Tail".

WHITMANII (The Ostrich Plume Fern.)—The well-known fluffy leaved fern; a popular florists variety.

General Collection of Plants and Vines

Ferns

WHITMANII COMPACTA ("The Parlor Fern")—

This is a condensed form of the "Ostrich Plume" Fern, with valuable characteristics added which are not evident in the parent—the pinnae subdividing, making miniature fronds which are superimposed on the main fronds, looking as if two or more were condensed in one. Graceful beyond description.

SCHOLZELI ("The Crested Fern")—The fronds, like Scottii, stand erect, and with a graceful arch, forming a plant of ideal shape, and they never break down, giving the plant a ragged appearance, as is so often the case with other plumed forms; furthermore, the loose, elegant arrangement of the fronds, allowing a free circulation of air through the foliage, prevents the center of even the largest specimens from becoming defective or yellow.

BOSTONIENSIS ("The Boston Fern.")—A variety that needs no description. Still the most popular of all varieties.

DWARF BOSTON—This new variety produces about twice as many fronds as the old Boston type. It is much more compact thus making a bushier plant and one that can be used in any decorative plan desired; equally useful in porch boxes or baskets.

EXALTATA ("The Old Original Sword Fern.")—The parent from which all varieties offered herein originated. Of distinctive growth, having longer and narrower fronds than any of its progeny, and of very erect growth. It is greatly used as a centerpiece in vases and baskets.

GOODI ("The Baby's Breath Fern.") (Good & Reese).—This Fern is splendid to use for fern dish planting. The finest foliage of all the ferns. Fronds very fluffy. A well-grown specimen is in great demand. It is of easy culture.

SCOTTII ("The Newport Fern.")—It is a rapid grower and to see it in all stages of growth from a runner in the bench to a fourteen-inch pot specimen will convince you that it will be in great demand as a house Fern. This has always been a favorite variety. **Two and one-quarter inch pots, \$1.00 per dozen; \$7.00 per hundred; \$65.00 per thousand.**

Japanese Flowered Peonies

The singularity of these "wonderful glowing suns" consists in their being entirely destitute of pollen, and sometimes nature asserts herself by showing a variety entirely destitute of any pollen or glandulous formation whatever, a mere mass of filaments like a "Crown of Thorns," surrounded by a guard of petals.
